

INDEX TO VOLUME XVI

GENERAL ALPHABETICAL INDEX

Entries from the Synopsis of Periodical Literature are indicated by S. (Synopsis); from the analysis of Current Electrochemical, Chemical and Metallurgical United States Patents by P. (Patents).

A

Abrasives. Artificial.	Williams.....	599
Acetone and methyl alcohol.	From soda pulp industry.	White and Rue.....
Acetone.	By-product from soda pulp industry.	Lawrence.....
Acids.	Transportation by water.	Morris (S.).....
Acid-resisting alloys.	Kowalke.....	227
Aetna Explosives Co.	oil cracking.....	581
Ainsworth, Wm.	657
Air drying.	Hering.....	167
Air drying.	Correction.	Hering.....
Air Reduction Co.	360
Alcohol.	And acetone from soda pulp industry.	White and Rue.....
—From calcium carbide.....	366	
—From molasses.	Osborn.....	438
—Methyl.	From soda pulp industry.	Lawrence.....
Report of U. S. Industrial Co.	416
Alkali industry in France.	356
Allison, S. E.	327
ALLOYS:	457
* Acid-resisting.	Kowalke	581
—Aluminum-calcium.	Cooper. (P.).....	707
—Arsenic-antimony	449	
—Bibliography.	Estes.....	273
—Bibliography of.	Comment on.	Anderson.....
—Chromium-copper-nickel.	(S.).....	360
—Cobalt.	Non-corrosive.	Kalmus.....
—Die-casting copper alloy.	55
—Electric furnace for melting.	Gillett and Lohr. (P.).....	53
—Manganese with brass and bronze.	Goldschmidt. (P.).....	400
—Melting of.	(S.).....	530
—Nickel-chrome.	Brix. (P.).....	228
—Nickel chromium analysis.	Koepping.....	319
—Systematic collection of properties by Bureau of Standards.	365
—Tool-steel.	Furness. (P.).....	164
—Zirconium.	Cooper. (P.).....	660
Alumina. Bauxite brick.....	210	
ALUMINUM:	
—Alloys with calcium.	Cooper. (P.).....	707
—Canadian production.	Denis.....	628
—From aluminum carbide.	Herschman. (P.).....	531
—In France	328
—Melting aluminum chips.	Gillett and James. (S.).....	52
—Production.	Haff. Mailloux.....	468
—Production in 1916.	296
Aluminium. Soldering compound.	Stewart. (P.).....	660
Aluminium carbide. Production.	Barnett. (P.).....	609
Aluminium carbide. (S.).....	530	
Aluminium chloride process of benzene and toluene production.	486
American Association for the Advancement of Science. Symposium on structure of matter.	72
—Chemical session	75
—Committee urges more publicity on research laboratories.	179
American Ceramic Society. Annual meeting.	305
American Chemical Society:	
—Kansas City meeting.	Announcement.....	305
—Program	405	
—Editorial on	465	
—Report	423, 481	
—New York Section: Celebration of twenty-fifth Anniversary.	308
—New York Section: Meeting.....	677	
American Electrochemical Society:	
—Buy Liberty Bonds.....	633	
—Detroit meeting.	Program.....	405, 470
—Editorial on	545	
—Report	567	
—New York Section:	Announcement of meeting.....	71

American Electrochemical Society—Continued

—New York Section. Symposium with New York Mining Engineers on smelter smoke and fume problem.....	128	
—Niagara Falls Section: Officers.....	335	
American Gear Manufacturers' Association. Report of convention.....	640	
American Institute of Chemical Engineers. —New York meeting: Program of.....	55	
—New York meeting. Report of.....	149	
—Program of Buffalo meeting.....	640	
American Institute of Mining Engineers. —New York Meeting Program.....	127	
—Report	248	
—St. Louis meeting. Zinc plants in district	554	
—Southeast Missouri mills.....	472	
—Chicago Section meeting.....	16, 707	
—Colorado Section: Meeting report.....	128	
Columbia Section: Meeting of.....	335	
—New York Section: Opportunities for American capital in foreign fields	308	
—New York Section:		
—Announcement of meeting.....	71	
—War problem meeting.....	676	
—Utah Section meeting.....	86	
American Iron and Steel Institute. Report of annual meeting.....	629	
American Mineral Production Co.	190	
American Physical Society. Meeting with A. A. A. S.	76	
American Society for Testing Materials. Program of annual meeting.....	628	
American Smelting and Refining Co. Work on smoke abatement Johnson	199	
Ammonium sulphate. From by-product gas producer. Tarr.....	373	
ANALYSIS:	
—Babbitt metal and journal bearing linings.	Koet	300
—Babbitt and white metals.	Hagmaier	84
—Cadmium in brass.....	484	
—Glass	604	
—Light oils.	Egloff.....	259
—Nickel chromium alloys.	Koepping.....	319
—Oxygen in manganese ores.....	487	
—Phosphorus in high speed steel.	Kraus	124
—Rapid filtering.	Schleicher.....	548
—Recovery of chinchonine. From solutions used in tungsten analysis.	Hagmaier	71
—Recovery of molybdic acid from phosphorus filtrates.	Hagmaier	12
—Rutile.	Hagmaier	588
—Training the works chemist.	Lathe	103
—Vanadium in steel.	Kraus	418
—Zinc.	Hastings	263
Annealing. Furnace.	Stevens. (P.).....	484
Antimony. Metallurgy.	De Cew	453
Antimony. Plating.....	444	
Apparatus. Chemical engineering.	Miles	587
A. R. G. Mining Co. Mill.....	81	
Arc. Chemistry of.	Mott	245
Arc Welding Machine Co. Welding system	581	
Armour plate plant for West Virginia.....	108	
Arsenic. Recovery from fumes.	(P.).....	534
Arsenic-antimony alloys	284	
Asbestos. Hydraulic press.....	449	
Asphalt. Nature and origin.	Richardson	533
Asphalt. Effect of overheating.....	25	
Astor, Vincent. Chamber of Commerce dinner. (Ed.)	487	
Astra lead burning apparatus	123	
Atom. Structure of	709	
Automobile. Use of grinding wheel.....	72	
B	599
Babbitt metal. Analysis of.	Hagmaier	85
Babbit. Analysis.	Koet	300
Bacon, E. C.	617
Bag for filtering fume.	Cameron (P.)	284
Ball mills. Being used by gold mining industry	5	
Duroloid pebbles	356	
Hardinge	417	
—Marcy mill.	Marcy	344
Bancroft, W. D.	232, 405
Banks, John H.	405
Barium. Use of barium compounds in desugaring	439	
Barnard, E. A.	350
Barstow Management Association	296	
Bauxite brick	210	
Bauxite. Shipments from British Columbia	624	
Bayle, E. J.	405
Baylis, J. R.	166
Beckers, Wm.	56
Beckman, J. W.	113
Beet molasses.	Osborn	437
Beets: Sugar from.	Benjamin (P.)	286
Bell, Alexander Graham. Poem on	628	
BENZENE (Benzol):	
—From petroleum.	Egloff	492
—From coal gas.	Corrections to Sperr's paper	301
—Recovery from coal gas.	Lessing (S.)	283
—Recovery from gas.	Sperr	135
—Rittman oil cracking process.	Bender (S.)	657
Berry, George M.	166
Bethlehem Steel Co. Potash from Blast Furnace.	Wyso	205
Birkeland-Eyde nitrogen fixation furnace.	Döyle (P.)	53
Bismuth. Basic salts.	Mutscheller	594
Bitumens. Exposure	486
Black Metal Reduction Co.	419
Bluestone: Manufacture of.	Addicks	689
Bogert, M. T.	711
Boiler Plate. Sodium hydroxide action.	Merica	497
Boiler settings.	Brick used	214
Bolivia. Our trade with	623
BOOK REVIEWS:	
—Anon: Selling your services	233	
—Bacon and Hamor. The American Petroleum Industry	348	
—Bond. The Engineer in War	167	
—Burdick. Chemical Tests for Minerals	457	
—de Vivaldi-Coaracy: Elementos de Electroquímica	167	
—Edwards: The Physico-Chemical Properties of Steel	167	
—Fay: Microscopic examination of steel	537	
—Handbook of Chemistry and Physics	350	
—Hansen and Cober: Diseases of Occupation and Vocational Hygiene	167	
—Hurley. Awakening of business	537	
—Johnson. Blast furnace construction in America	663	
—Lovelace: Annual Chemical Directory of the United States	664	
—McWane: Pipe and the Public Welfare	233

—Russell. Operation of Gas Works	664	
—Scott. Standard Methods of Chemical Analysis	711	
—Venable. Radio-activity	537	
Boulder Tungsten Products Co.	562	
Bramson, C.	406
Brass: Alloying with manganese.	Goldschmidt and Weil (P.)	400
—Grain size determination.	Miller	378
—Influence of arsenic.	Smalley (S.)	607
—Melting.	Thornton (S.)	529

INDEX.

Brazing material. Fuller (P.)	400
Brick: Bauxite	210
—Chrome	210
—Fire clay	210
—Magnesia	209
—Silica. New uses. Gray	209
Brines. Examination	485
Bristol Company. Automatic temperature controllers	347
Bronze: Alloying with manganese. Goldschmidt and Weil (P.)	400
Bronze. Tests on Ampco bronze	55
Brown, E. M.	423
Browne, David H.	415
Bufloval and buflokast apparatus	154
Buffalo Mines, Ltd. Annual report	72
Bureau of Mines: Idaho station	532
—Opening of Washington station	165
—Station at Golden, Col.	664
—Work of	111
Bureau of Standards. Properties of metals and alloys. Study of	365
Burrell, Geo. A.	56, 617

C

Cadmium. Metallurgy of. Juretzka-Ralston	146
Calcium: Alloys with aluminum. Cooper (P.)	707
Calcium carbide: Alcohol from	366
Calcium carbide: In France	325
Calcium carbide furnace with by-product recovery. Reid. (P.)	706
Calcium fluoride: Used in potash process	702
California oil fields	454
California. Survey of resources	661
California Trona Company. Case of the Government against	15
Cambridge Glass Co.	296
Campbell, J. A.	457
Canada: Potash from feldspar. Benham, (S.)	704
Canadian Pacific Railway. Hydro-electric exhibit	455
Candle industry: Twitchell process. Ittner	144
Carbides. Researches on. Briner (S.)	530
Carbon articles. Manufacture of. Clymer (P.)	659
Carolina, Clinchfield & Ohio R. R. New plants along	364
Carpenter, J. A.	350
Carrier, C. F., Jr.	470
Carty, J. J.	457
Case-hardening of steel. Stenger	425
Castings. Preparing iron for. Kranz (P.)	164
Caustic alkali manufacture. Ashcroft (P.)	107
Caustic soda industry in France	327
Celite. Progress in use of	54
Cells. Use of tungsten in voltaic and standard cells. Koerner	45
Celluloid in Japan	456
Cellulose: Electrical treatment. Nodon (P.)	107
Cement Mills. Potash from	653
Cement: Potash from. Riverside plant	701
Cementation of iron and steel. Thum	385
Cementation of steel. Stenger	425
Cements: Plastic. Barnett	321
Census of New York City's factories and mercantile houses	632
Census of technical men	422
Centrifugal force on colloids. Ayres	190
Centrifugal pump. De Laval	660
Chemical engineering equipment. Development in. Miles	154
Chemical engineer. Training of	421
Chemical industries. Canada. Howe	487
—Human side of development. Thompson	149
—Japan. Nishida	505
—Switzerland	415
Chemical market. Review of 1916	57
Chemical porcelain. Binns	395
Chemicals: Demand in Spain	239
Chemist. The call for. Moody	641
Chemist. Training the works. Lathe	103
Chemists' Club. Annual meeting	566
Chemists' Club Employment Bureau	641
Chewing gum. Chemistry of	486
Chile. Field for capital	478
—Nitrate industry. Hobbsbaum	253
—Nitrate industry	525
China. Production of salt in Szechuan province	32
Chinchonine. Recovery of. Hagmaier	70
Chlorine compounds: French manufacture	325
Chlorination. Photochemistry of. Taylor	76
Chrome brick	210
Chromium-copper-nickel alloys (S.)	608
Cincinnati: University of. Dedication of chemical laboratory	471
Cincinnati: University of. New chemistry building	367
Clevenger, G. H.	665
Cline waterpower bill	175
Coal. Action of solvents on. (S.)	282
—Powdered	614
—Recovery of benzol from coal gas. Lessing. (S.)	283
Coal-gas for metal melting. (S.)	530
Cobalt. Addition to very pure commercial iron. Kalmus and Blake	82
Cobalt. Non-corrosive alloys. Kalmus. (S.)	306

COKE:

—Bee-hive production in 1916	718
—By-product. (Ed.)	68
—Fellowship in low-temperature coking	247
—Increasing use as boiler fuel in England. Note	158
—Necessity for by-product ovens	175
—Recent developments in by-product industry in Japan. Kurahashi	700
—Recovery of benzol from gas. Sperr	135
Coke Ovens. By-product construction	216
—Brick use in bee-hive ovens	214
—Waste heat boilers in bee-hive oven industry. Pratt	27
Colloids. Effect of centrifugal force. Ayres	190
—Technological aspects	474
Colorado Scientific Society. 326th meeting	16
Columbia University. Course in laboratory organization	699
Colville. Archibald	167
Concentration. New mills	245
—Colorado tungsten ores. Fischer	559
Elosol dry concentrator	709
Graphite, gunpowder, and malt. Wiard	654
Magnetic separators	632
Condensate cellulac	109
Conder, R. E.	665
Conductivity measurements. Graham	76
Conductors for electric furnaces. Lindström	683
Cooling tower for condensing water	710

COPPER:

—Corrosion of tinned copper. Merica. (S.)	657
—Exports by countries in 1915 and 1916	544
—Flotation practice in 1916	2
—From mine water	246
—Hydrometallurgical extraction. Weidlein. (P.)	227
—Metallography of. Schwarz	52
—Operations at Chile. Exploration Co. Rose. (S.)	162
—Prospective increase of refining facilities	246
—Refining. Current density. Addicks	311
—Refining. Current efficiency. Addicks	23
—Refining. Impurities in electrolytic refining. Addicks	687
—Impurities in. (Ed.)	674
—Refining. Method of connecting electrodes. Whitehead. (P.)	227
—Review of 1916	3
—Vaporization of in wirebar furnaces. Butts	85
—Wet extraction process. Bradley. (P.)	164
Copper sulphate. Manufacture of. Addicks	689
Copper carbide	530
Corporate versus individual effort. Finlay	301
Corrosion of cast iron. Richardson	582
Corrosion. Tinned sheet copper. Merica. (S.)	657
Cottonseed products industry	624
Cotton. Fumigating	346
Cottrell electrical dust precipitator. Collecting cement dust	702
Cottrell process in practice. Bradley	337
Cottrell precipitation process. Theory. Strong	648
Cottrell, F. G.	113
Couch, James F.	665
Coulter, V. A.	232
Council of National Defense. Personnel of Committees and sub-committees	633
Countercurrent decantation. Eames	94
Craver, H. W.	457
Credits. Chemical. Hendrick	126
Crit-point instrument	55
Crook, W. J.	406
Crusher. Largest gyratory	286
Cupolas. Brick construction	215
Cuprous oxide photochemical cell	587
Current density in copper refining. Addicks	311
Current efficiency in copper refining. Addicks	23
Cushman, Allerton S.	711
Cyanides. In gold and silver metallurgy	5
Cyanides. Foersterling and Philipp. (P.)	401
Cyanides. Nitrogen fixation. Bucher	315

D

Davis, Meyer	56
Decantation. Countercurrent. Eames	94
Degge-Clark tungsten mill	565
De Laval centrifugal pump	660
Dessau sugar refinery	440
Detarring gas. Steere	695
Distillery experiments	486
Dolbear, S. H.	232
Dorr, J. V. N.	56, 113
Dorr metallurgical apparatus	94
Dow, H. H.	288
Dreyfus, F.	166
Drobegg, G.	232
Drucker, A. E.	665
Dryer. Atmospheric drum	223
Drying. Air correction. Hering	360
Drying by air. Hering	187
Dumas, W. C.	617
Dunkle, W. E.	665
du Pont de Nemours Co. Annual report	350

Duroloid pebbles	356
Dust collector. Robertson	662
Dutton, F. B.	288
Dwight-Lloyd sintering machine. Improvements. Gayley. (P.)	228

DYESTUFFS:

—Annual meeting of Bradford Dyers' Association	464
—Appropriation	186
—Big companies merger	418
—Consolidation of large companies	471
—Cooling condensing water	710
—Difficulties of British industry. Whitaker. (S.)	282
—Discussion at Textile Club	384
—Japanese by-product coke and dyestuff industry	700
—Organic processes. Ney and Van Marle	217
—Production in U. S. in 1916	672
—Progress in the American industry. Hebdon	474
—Society of Dyers and Colorists Meeting. (S.)	607

E

Economics. Our economic future	675
Efficiency. Mental	466
Efficiency engineers. Poem	180
Eilers, Anton	467
Eldridge, D. F.	406
Electric drive in sugar mills	288
Electric porcelain. Barringer	433
Electrochemical industries and the Pacific Coast. Beckman	360
Electrochemical industries. Niagara Falls in 1916	7

ELECTROCHEMISTRY:

—Electrochemical analogies of photochemistry. Mott. (S.)	226
—Exhibit of Canadian Pacific Railway	455
—France. Mailloux	324
—University of Cincinnati. Thum and Davison	367
—In France. Mailloux	265
Electrocyanide process	456
Electrodes. Magnetite. Thompson	605
Electrodes. Method of connecting in electrolytic refining. Whitehead. (P.)	227
Electrolytic equivalents of gases. Hering	383
Electrometallurgy in 1916	9
Electron. Enlarged. Hering	598
Electroplating. Causes brittleness in steel springs. Thompson	83
Electroplating. Papers on. (Abstracts)	587
Electrotyping wall coverings. McIndoe. (P.)	285
Elements. Evolution of. Harkins	73
Elevators. Portable	534
Elliot Cresson Medal for E. F. Northrup	180
Elsol dry concentrator	709
Elwood, W. F.	535
Employers' responsibility. Beckman	550
Endosmosis. Electric	587
English. Engineers lack of	243
Epicassit for rust proofing	403
Equivalents of gases. Electrolytic. Hering	383
Evolution. Industrial	358
Exfoliation in case-hardening of steel. Stenger	425
Explosives. Application of nitro-aromatics. Mardick	303
—By-products from manufacture	672
—Comment on nitro-aromatic article. Munroe	360
—Use of nitro-starch. Sadler	361
Exports. Our export trade	242
Exports. To HongKong	544
Exposition. Springfield	451
Exposition of Chemical Industries. Third National	679
Extraction apparatus. Automatic. Ogden. (P.)	402
Eyde. Sam	56

F

Fairlie, A. M.	166
Faraday Society. Eighty-first meeting	247
Faraday Society. Symposium on training the chemical engineer	420
Faraday Society. Symposium on osmotic pressure	680
Faraday. An enlarged electron. Hering	598
Farish, F. G.	350
Federal Dyestuff & Chemical Co. Photo	364
Federal Dyestuff & Chemical Co.	474
Feldspar. Grading of. Wiard	449
Feldspar. Potash from. Blumenberg. (P.)	453
Feldspar. Potash from. in Canada. Benham. (S.)	704
Fellowships at University of Utah	536
Fellowships in metallurgy at University of Washington	708
Ferro-alloys. French production	334
—Manufacture. de Nolny. (P.)	343
—Manufacture of. Ladoff. (P.)	707
—New company in Denver	15

INDEX.

Ferrocyanides. Bucher.....	315	Furnace, Electric—Continued	
Ferromanganese. Anderson. (S.).....	705	Helfenstein.....	509
Ferrosilicon. Keokuk Electro Metals Co.	672	High temperature. Fahrenwald.....	565
Ferozirconium	412	Improvements in Birkeland-Eyde furnace. Doyle. (P.).....	108
Fertilizers. Artificial. Ling. (S.).....	609	Induction furnace for melting	
Filteau, C. A.	350	Metals. Scott. (P.).....	53
Fire brick. Suggestion on leaching fire-clay.....	414	Melting furnace for alloys. Gillett and Lohr. (P.).....	53
Fire clay brick.....	210	Oil cracking furnace. Hirt. (P.).....	659
Fireworks. Grading of. Wiard.....	449	Ore reduction furnace. Moffat. (P.).....	285
Filtering. Analytical. Schleicher.....	548	Phosphoric acid furnace. Heckenhleickner. (P.).....	107
Flaming arc. Mott.....	581	Refractory testing furnace. Griffiths. (S.).....	225
FLOTATION:		Rennerfelt operation. Von Baur. Schönherz furnace improvements. Edwin. (P.).....	580
—Canada	418	Zinc furnace. Fulton. (P.).....	108
—Decision of Appellate Court in Miami case.....	629	Manufacture of:	
—K and K machine.....	346	Abrasives. Williams.....	599
—Legal status of process.....	125	Aluminium. Hershman. (P.).....	531
—Magma sulphide filming plant. Callow low.....	251	Carbon articles. Clymer. (P.).....	659
—Miami infringement case. Court of Appeals decision.....	677	Ferroalloys in Denver.....	15
—Miami suit hearing.....	181	Nickel. Robert. (P.).....	343
Molybdenite	306	Phosphoric acid. Heckenhleickner. (P.).....	107
New departures	306	Pig iron in Sweden.....	509
Oil from shale	180	Steel in England.....	533
Patent suit decisions. Choate.....	469	Furnace: Fuel gas and electric combined. Helfenstein (P.).....	531
Practice in 1916.....	2	Furnaces: Hand-fired. Combustion in.....	344
Suit decision	2	Furnaces: Heating. Waste heat boilers. Pratt.....	29
Supreme Court decision in Hyde flotation suit.....	21	Furnace: Open hearth. Brick construction.....	214
Tungsten ores	306	Furnace: Regenerative. Device for reversing. Knox. (P.).....	163
Flour, Grading of. Wiard.....	449	Furnace: Regenerative. Compared with recuperative. Steere.....	698
Flynn, F. N.	617	Furnace: Roasting. Quicksilver. Whitton. (P.).....	706
Foster, R. S.	711	Fusion: Caustic in dyestuff manufacture.....	221
Foundry, Lunkenheimer's new.....	113		
Foundry sand	663	G	
France: Electrochemistry. Mailloux.....	399	Gaines, W. H.	166
France: Hydro-electric power and electrochemistry. Mailloux.....	324	Gallium: Electrolysis of solutions. Uhler. (P.).....	163
Fraunfelder, C. D.	265	Galvanizing. Surface combustion. Harris.....	613
French National Laboratory of Physics and Mechanics.....	233	GAS:	
Fresno Mining Exchange.....	186	—Compared with water power. Tarr.....	373
Fritz, John. Medal.....	647	—Conservation in oil fields.....	161
Front office.....	471	—Density of flue gases. Smith.....	160
Fuel briquettes. Production in 1916.....	9	—Effusion method for density. Edwards.....	518
Fuel: Use of low grades. Kershaw.....	356	—Electric furnace for treating. Moscicki. (P.).....	53
Fume: See also Smoke.	229	—Electrolytic equivalents. Hering.....	383
—Bag filtering. Cameron. (P.).....	284	—Industrial burners.....	454
—Electrical precipitation. Strong.....	648	—Melting metals. Walter. (S.).....	529
—Precipitation. Cottrell process in practice. Bradley.....	336	—Natural gas wells in China. Richardson.....	39
—History and legal phases. Johnson.....	199	—Oxy-illuminating gas lead burning apparatus.....	709
—Robertson collector.....	662	—Public session of American Chemical Society.....	483
Fumigating baled cotton.....	346	—Specific gravity.....	486
Furnace: Annealing. Regenerative. Stevens (P.).....	453	—Versus waterpower.....	357
FURNACE, BLAST:		Gas benches. Use of waste heat boilers with. Pratt.....	31
—Calculation of lead blast furnace charges. I. Dudley.....	87	Gas Producer. By-product.....	357
—Chemical reactions of iron smelting. Mathesius.....	636	Gas retorts. Brick construction.....	216
Dudley. Part II.....	129	Gasoline: From oil shales.....	71
Dust collector. Simoney (P.).....	284	—One billion gallons synthetic in 1918. Rittman.....	555
Furnace with auxiliary electric heating. Chance. (P.).....	659	—Situation. Manning.....	631
Future of the iron blast furnace. Johnson.....	17	General Chemical Co. Officers.....	356
Potash as a by-product. Wyson.....	205	Germanium. In blends.....	484
Power plants for Rice. (S.).....	528	Germany. Solving of wartime problems. (S.).....	658
Preheating gases. Oesterlen. (P.).....	532	Glass: Analysis. Hagmaier.....	604
Recent practice.....	250	Glass: Coloring by light. Rosenthal.....	677
FURNACE, ELECTRIC:		Glass: Manufacture of quartz glass. Trautmann. (P.).....	343
—General:		Glass: Union of by heat treatment. Parker. (S.).....	226
Characteristics. Meyer.....	580	Glycerine: Twitchell process and the glycerine trade. Langmuir.....	143
Control of phase relations. Dixon. (P.).....	285	Goethals, G. W.	232
Electrode. King. (P.).....	659	Gold and Silver. Countercurrent decantation. Eames.....	94
French electrometallurgy.....	328	—Cyanide process. New Electrocyanide process.....	456
Furnace control apparatus. Seede. (P.).....	164	—Decantation plant of Hollinger Co.	98
Hearth construction. Gray. (P.).....	532	Metallurgy in 1916.....	5
